Justin Nguyen

San Jose, California - Boulder, Colorado

+1-408-440-6017 justinnguyendark@gmail.com justin-nguyen-77810a23a jung2014

EDUCATION

University of Colorado Boulder **Expected May 2028**
B.S. Computer Science - ABET-Accredited Program *Boulder, CO*

COURSEWORK / SKILLS

- Data Structures & Algorithms
- Computer Systems
- Discrete Structures
- Database Systems
- Software Development Methods
- Object-Oriented Analysis and Design
- Algorithms
- Principles of Programming Languages
- Linear Algebra with Computer Science Applications

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, SQL, HTML, CSS

Frameworks/Libraries: Node.js, Bootstrap

Tools: Git, GitHub, VS Code, Docker, Postman, Cursor, GitHub Copilot, ChatGPT, DeepSeek, Perplexity, Jupyter Notebook

Databases: MySQL, PostgreSQL

Other Skills: RESTful APIs (JSON/HTTP)

PROJECTS

BudgetBites | Node.js, Express, CSS, HTML, PostgreSQL, Regex, Render **Nov 2025**

- Developed a full-stack meal planning web application to help users discover recipes and manage grocery planning efficiently.
- Integrated the Spoonacular API to enable ingredient-based recipe search and retrieval of nutritional data.
- Implemented a grocery list generator that aggregates ingredients across recipes, groups items by aisle, and estimates total cost.
- Applied regex-based email validation and input sanitization to reduce malformed data and XSS risk.
- Live Application
- Repository

Personal Website | HTML, CSS, Bootstrap, GitHub Pages **Sep 2025**

- Designed and built a responsive personal website to showcase projects, resume, and technical interests.
- Implemented semantic HTML and Bootstrap components to ensure cross-device responsiveness.
- Deployed the site using GitHub Pages with organized repository structure and asset management.
- Debugged deployment and styling issues to deliver a fully functional live site.
- GitHub Pages Website
- Repository

Dungeon Pathfinder | C++, Data Structures, Algorithms **Apr 2025**

- Built a dungeon navigation system to compute shortest paths using Dijkstra's algorithm.
- Implemented custom heap and hash table structures to optimize priority queue performance.
- Modeled dungeon layouts using adjacency lists to support efficient graph traversal.
- Balanced runtime efficiency and memory usage through modular algorithm design.
- Repository

Lion King Board Game | C++, OOP, File I/O **Dec 2024**

- Developed a turn-based board game simulation featuring dual-path gameplay and probability-driven events.
- Applied object-oriented principles including inheritance and polymorphism to manage game entities.
- Implemented file I/O to persist player progress and game state across sessions.
- Improved system reliability through iterative debugging and abstraction.
- Repository

EXPERIENCE

Stanford Golf Camp **Jun 2025**
Camp Counselor *Stanford, CA*

- Supervised 10 campers daily while enforcing safety guidelines in a high-energy environment.
- Taught golf fundamentals to improve engagement and skill development.
- Collaborated with coaches to maintain consistent instruction across groups.
- Adapted communication and leadership style to meet diverse camper needs.
